

Dr. Andrey Markov is a senior researcher at the Institute of Chemical Biology and Fundamental Medicine, Siberian Branch of the Russian Academy of Sciences. He graduated from the Faculty of Natural Sciences of Novosibirsk State University in 2005 and defended Ph.D. thesis in Biochemistry at the Institute of Chemical Biology and Fundamental Medicine in 2015. Dr. Markov A. V. is the leader of three scientific projects of the Russian Science Foundation and the author of 25 papers published in journals cited in Web of Science and Scopus. The group of Dr. Markov is interested in developing novel small molecules with antitumor and anti-inflammatory properties based on natural metabolites using computational biology methods and bioinformatics analysis of regulomes responsible for the development of socially significant pathologies.
